# Harsh Srivastava

Lead SDET | Senior Automation Test Engineer | Java | Selenium | API Testing | CI/CD

## PROFESSIONAL SUMMARY

Automation Test Engineer with 6 years of experience delivering quality engineering solutions for enterprise security products. Strong expertise in Java, Selenium WebDriver, TestNG, REST Assured, Jenkins, Git, API Automation, Backend Validation, and Automation Framework Design. Proven track record in building scalable test frameworks, driving release quality, mentoring engineers, and collaborating with Product, Engineering, and DevOps teams. Experienced in automation-first testing strategies while maintaining strong manual testing and exploratory testing capabilities.

## TECHNICAL SKILLS

Languages: Java, SQL
Automation: Selenium WebDriver, Selenium Grid, TestNG, Maven
API Testing: REST Assured, Postman
CI/CD: Jenkins, Git, GitHub, Bitbucket
QA: Functional, Integration, Regression, Smoke, Sanity, Exploratory Testing
Frameworks: Hybrid Framework, Data-Driven Framework, Page Object Model (POM)
Tools: JIRA, Confluence
Additional: Backend Validation, Release Readiness, Defect Management, Agile Scrum

## PROFESSIONAL EXPERIENCE

Seceon Inc. | Senior Test Automation Engineer | June 2020 – Present

• Designed and enhanced scalable automation frameworks using Java, Selenium WebDriver, TestNG, Maven and Jenkins.
• Built automated UI and API test suites for enterprise-grade security products.
• Integrated automation suites into CI/CD pipelines enabling continuous validation of product releases.
• Developed API automation coverage for backend services using REST Assured and Postman.
• Performed backend validation and database verification for critical workflows.
• Reduced regression execution time through parallel execution and framework optimization.
• Led release readiness validation and quality sign-off activities for multiple product modules.
• Mentored junior engineers on framework architecture, coding standards, automation best

practices and CI/CD integration.
• Executed functional, integration, regression, smoke and exploratory testing for complex releases.
• Collaborated with Product Managers, Developers and DevOps teams throughout the SDLC.
• Created detailed test strategies, test plans, traceability matrices and defect reports.
• Managed end-to-end defect lifecycle and root cause analysis using JIRA.
• Contributed to AI-assisted testing initiatives including self-healing automation and visual validation approaches.

## EDUCATION

Bachelor of Technology (Computer Science Engineering) – AKTU
