QA Measured Data Objectivity Statement

The application presents measured resource data objectively. The monitoring system does **NOT** claim that EPP/EDR caused system resource utilization merely because its processes crossed the thresholds. Resource attribution is partitioned across: 1. EPP/EDR Resource Consumption 2. Other High-Resource Processes 3. Overall System Baseline

EPP/EDR Resource Consumption

TARGET FOCUS

Seceon Security Agents Specific Metrics

PEAK AGGREGATE EPP/EDR CPU

34.6%

AVERAGE AGGREGATE EPP/EDR CPU

14.8%

PEAK AGGREGATE EPP/EDR MEMORY

312 MB

AVERAGE AGGREGATE EPP/EDR MEMORY

245 MB

TOTAL DURATION EPP/EDR CPU > 15%

3m 22s

TOTAL DURATION EPP/EDR MEM > 200 MB

1m 20s

EPP PROCS EXCEEDING CPU THRESHOLD

2

EPP PROCS EXCEEDING MEM THRESHOLD

1

System Resource Context

HOST CONTEXT

Host Machine Utilization Baseline

PEAK OVERALL SYSTEM CPU

78.5%

AVERAGE OVERALL SYSTEM CPU

31.8%

PEAK OVERALL SYSTEM MEMORY

6.73 GB

AVERAGE OVERALL SYSTEM MEMORY

5.98 GB

PEAK AGGREGATE EPP/EDR CPU

34.6%

PEAK AGGREGATE EPP/EDR MEMORY

312 MB

High Resource Consuming Processes

Processes that exceeded **CPU > 15%** OR **Memory > 200 MB** during the selected reporting period. Seceon EPP/EDR processes are visually highlighted.

PROCESS NAME	CATEGORY	PID	PEAK CPU	AVG CPU	PEAK MEMORY	AVG MEM
SeceonEPP-ExploitDP	Seceon EPP/EDR	5124	32.8%	12.5%	287 MB	210 M
chrome.exe	Windows Process	14210	24.1%	8.5%	1.17 GB	950 I
SeceonEPP	Seceon EPP/EDR	5120	18.4%	7.2%	214 MB	180 M
java.exe	Windows Process	8904	17.6%	5.1%	540 MB	490
